

XML documentation for importing products to Kainos.lt

Field	Type	Explanation	Required
products	array	This is root element of document.	Yes
product	array	Each product record should be enclosed in this tag.	Yes
title	string	Title of product as shown in customers shop.	Yes
item_price	decimal	Final price of item (taxes included).	Yes
manufacturer	string	Manufacturer title of product.	Yes
image_url	string	URL for main image. Clearly visible front facing image of product.	Yes
product_url	string	URL of product page.	Yes
categories	array	One or more categories enclosed in this tag, each category title enclosed in 'category' tag. Category should be provided as '/' separated path of category tree (for example: Electronics/Phones/Mobile Phones).	Yes
description	string	Description of product.	No
stock	int	Number indicating current stock count of product.	No
ean_code	string	Also known as bar-code.	No
manufacturer_code	string	Manufacturer code (usually referred to as MPN). This code uniquely identifies a given product and its variations in manufacturers system. If provided correctly it greatly enhances our ability to automatically match different products.	No
model	string	Model of product. For example if product in question is Apple iPhone 5s 16GB, this field would contain 5s 16GB.	No
additional_images	array	Additional images for product. For example product from different angles.	No
specs	array	Specs of product (things like processor speed, screen diameter etc...). Each individual spec value should be enclosed in 'spec' tag (spec name should be provided as attribute 'name').	No
wholesaler	string	Supplier title.	No
wholesaler_code	string	ID which identifies product within suppliers system (won't be displayed publicly, but can aid in tying different products together automatically).	No

Sample XML file for importing products to Kainos.lt

```
<?xml version="1.0" encoding="utf-8"?>
